

## Transcript: Why I got my COVID-19 Vaccine (Spanish)

Hello families. I'm here and I want to tell you a little bit about why I am going to get vaccinated. I am going to get the vaccine because I want them to have me in their lives. Today they are a little bigger - they are 11 and 14 years old. Today they need me more than ever but in the future, I am going to get vaccinated for you, because I want to keep working on this healthcare team, which is so precious. I am also going to get it because I don't want to lose anyone else in the community. Since I'm getting it, I want everyone else to get it too, so we can have a vibrant and happy community.
